SHANKARRAO BHELKE COLLEGE

Nasrapur, tal-bhor, dist- pune

Dept : BBA(CA)

TY.BBA(CA)

SYNOPSIS

- **PROJECT NAME** :- Chat application
- **FRONTEND :-**React, Tailwind, shadcn, chakraUI
- **BACKEND :-** ExpressJs, MongoDB
- **TEAM SIZE** :- 2
- **MEMBER NAME** :- 1) Sagar Sadanand Shetty
  2) Atharv Rajesh Bathe
- **Prof :-** Ankita Mahangare
- **Project description :-**

A Chat Application built using the MERN stack (MongoDB, Express, React, and Node.js) leverages a unified JavaScript environment to manage real-time data exchange and persistent storage. In this architecture, Node.js and Express provide a scalable backend infrastructure, while MongoDB serves as a flexible NoSQL database for archiving message history and user profiles. The power of this stack lies in its ability to handle asynchronous operations efficiently, ensuring that the server remains responsive even as multiple users send and receive messages simultaneously.

- **Project description :-**

The shopping portal is a web-based platform designed to facilitate online shopping. It enables users to browse products, add them to a cart, and purchase them through secure payment options. The portal aims to provide a user-friendly experience with efficient navigation and a wide variety of products.

The purpose of the shopping portal is to streamline the shopping process for customers, allowing them to shop from the comfort of their homes, compare prices, and access a variety of products that may not be available in physical stores. It also serves retailers by providing a platform to reach a broader audience.
